

RadiForce® R12

19" CLASS COLOR LCD MONITOR

With versatile image control and landscape/portrait mode support, the R12 is ideal for viewing CT and MRI images or use as a HIS terminal.

CALIBRATION SUPPORT AND QC MANAGEMENT

The R12 offers long-term image quality and consistency through EIZO's optional RadiCS RX1 calibration kit. RadiCS RX1 features include acceptance testing, calibration to the DICOM Part 14 standard, detailed calibration history reports, test pattern checks, and automatic correction of brightness and gamma changes. It also offers manufacturer-independent asset management of PC, graphics boards, and monitors.

TONECURVE TUNING UTILITY

This EIZO-developed software utilizes the R12's dual 10-bit Look-Up Tables for adjustment of tones to the desired values. Once values have been set, they can be saved to a control PC and shared with other RadiForce color 1MP and 2MP monitors.

DICOM MODES

EIZO's front button operated Fine Contrast function consists of six user-selectable modes, each with different settings for contrast, brightness, and gamma. It includes two DICOM modes – DICOM-CL and DICOM-BL for clear base and blue base film – as well as Custom, sRGB, Calibration, and Text modes.

AUTO FINE CONTRAST

This feature assigns a mode to a particular application so the mode automatically changes when the application runs. For example, use Custom mode at a high brightness setting for viewing a CT image or Text mode when going over patient charts.

*Auto Fine Contrast is included with the bundled ScreenManager Pro for LCD application, which runs on Windows 98SE/Me/2000/XP only.

BRIGHTNESS STABILIZATION

● Drift Correction Circuit

Quickly stabilizes the brightness level after startup or coming out of power save mode.

● Auto Brightness Control

The monitor detects and automatically compensates for brightness changes caused by surrounding temperatures and the passage of time for stable brightness and longer service life.

SLIM BEZEL DESIGN

Narrow bezels along all four sides save space and require less eye movement in a multi-panel environment. Other features include a 100 mm height adjustable stand, 41° tilt, 70° swivel, and 90° portrait orientation.
